

ICS XPREZZ™

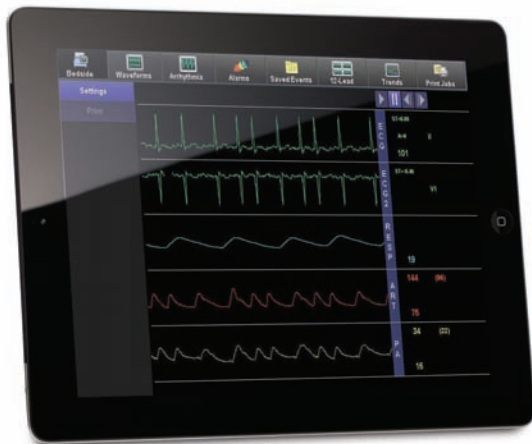

Continuity of Care — from Anywhere

Available on the
App Store

ICS XPREZZ™

ICS XPREZZ provides the support clinicians need to always be there for patient care.

With ICS XPREZZ Spacelabs Healthcare takes mobility of care to a higher level, providing the power of ICS G2 Clinical Access in the palm of your hand.

Now clinicians on the go can have access to comprehensive patient information, including near-live waveforms and graphical trends, on their iPads or other mobile devices.

Decisions can be made more quickly than ever before with critical patient information in the palm of your hand.

Designed for Mobility

ICS XPREZZ is the perfect fit.

- Simple and cost effective: Connect Spacelabs monitors and view with ICS XPREZZ, using your network
- Designed for touch screen: Perfect for tablets
- Secure: No patient data processed or deposited into the iPad
- Consistent: Identical user interface regardless of location — tablet, PC or bedside monitor

Have all your patient information with you, all the time:

Bedside View
How is your patient doing now?

Waveform View
Smart disclosure.

Arrhythmia View
Retrospective Holter analysis.

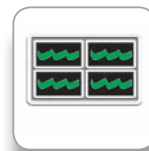

Alarms View
Alarm event review.

Saved Events View
Saved events, alarms, arrhythmias and strips.

Trends View
Customized – sorted, grouped and prioritized the way you like it.

12-Lead View
Compare 12 leads to evaluate treatment.

Print Jobs View
Preview, print or reprint monitor recordings.
