

**¡lo escondemos
para ti!**

Beltone

TOUCH™

 **Beltone™**

¿Cómo hacer que el audífono más pequeño del mundo sea aún más pequeño?

El secreto de Beltone Touch es su emocionante diseño. Lo hemos hecho más pequeño que nunca, tomando el micrófono (uno de los componentes principales de un audífono) fuera de la parte que lleva en el canal auditivo.

En cambio, el micrófono se oculta en el extremo superior de su oído externo, donde se filtra mejor el sonido.

Beltone

TOUCH™

**Un audífono prácticamente invisible
que se lleva totalmente su oído.**

Escóndelo

Es tan pequeño que casi desaparece
en su oído.

Llévalo

Prácticamente se convierte en una
parte de usted: tan cómodo y seguro
que se olvidará que lo lleva puesto.

Escúchalo

Se aprovecha de la morfología de su
oído, y se ajusta automáticamente
a los diversos entornos dónde se
encuentra.

escóndelo

Tener confianza

Siéntase seguro de sí mismo con un audífono que nadie puede ver. Beltone Touch es:

- Casi invisible
- Dentro de su oído

Diseñado para la discreción

Beltone Touch is un 36% más pequeño que un CIC habitual. Es verdaderamente invisible en la mayoría de personas y apenas perceptible en muchas más. Está diseñado para encajar en el interior de su oído - porque la gente como usted nos explicó que es lo que necesitaban.

Mas o menos todos alguna vez (apenas) ven el tubo delgado y transparente en su oreja. Éste sostiene Beltone Touch cómodamente dentro de su oído. Por esto es tan diferente de los demás audífonos, cosas como cepillarse el cabello, usar gafas o incluso una actividad física vigorosa ya no supondrá un problema para usted.

wear it

You may just forget

... That you're wearing it! Beltone Touch is so comfortable you may hardly remember you have a hearing aid on:

- When you move, it moves with you
- It fits comfortably in your ear
- No embarrassing whistling

Moves with you

You can put Beltone Touch on and then forget it. No matter how active you are it moves with you. Beltone Touch's thin transparent tube keeps it locked in place. All the time.

Comfortable to wear (really!)

There's a Beltone Touch Instant model with smooth rounded edges that fits comfortably in your ear. Or you can choose a Beltone Touch model that's custom made just for you. Either way, Beltone Touch provides you with a level of comfort that lets you go about your business as usual. Plus, when you wear a Beltone Touch open-fit instrument, there's no "clogged-up" feeling or uncomfortable sounds – for example, when you chew. And your own voice sounds natural.

Forget about embarrassing whistling!

With Beltone Touch, you won't be embarrassed by your instrument whistling. The only sounds you'll hear are the ones you want to hear.

hear it

Think like an ear

The world's best hearing system is the healthy human ear. With Beltone Touch, we've done our best to make the most of the ear's characteristics.

So you get:

- Better, natural-sounding hearing
- An easier time following conversation when there's background noise – even wind noise

Inside sounds better than outside

Because Beltone Touch sits entirely inside your ear, it makes the most of your ear's own sound paths. That means even when there's background noise, you'll have an easier time understanding speech.

Natural protection – natural relief

When you're outside and the wind is whooshing, it can be hard to hear anything else. But with Beltone Touch, the microphone is shielded from the wind in the recesses of your ear. This virtually eliminates tiring wind noise.

**“It fits entirely
in my ear?
Then that’s
the one I want.”**

During a recent consumer study, people liked Beltone Touch as soon as they saw it. But when they realized that it fit entirely inside their ears, Beltone Touch became their first choice.

This is how Beltone Touch works:

- The shell fits discreetly and comfortably in your ear canal
- The mic is hidden in the upper end of your outer ear

Beltone

TOUCH™

Everybody has the right to good hearing

Beltone was founded on the act of helping a friend to enjoy life more. Since 1940, we have provided knowledge, tools, service and training to the professionals servicing the hearing impaired. Beltone makes quality hearing care available to more people. To do so, we develop technically optimal hearing solutions without ever losing focus on the individual's needs. It is our belief that no individual should be denied the possibility of an improved life with better hearing.
